Dear Steve:

I hope that you enjoyed and profited from your visit to the Agency on June fourteenth as much as I and my staff did by having you as our guest. I found our discussions most stimulating and helpful. I am most grateful to you, not only for your understanding and candor but also because I know how difficult it must have been for you to spare us a whole day of your time at such a busy time of the year.

If you have any post-visit reflections on what you saw and heard here, I should appreciate having them. Meantime, I am moving to take advantage of what we learned from you, and from the suggestions you left behind.

Yours,

/s/ Stansfield Turner

Dear Jack:

I am most grateful to you for visiting us with your colleagues on June fourteenth. I found our exchanges both stimulating and helpful. Indeed, although our relations with academia in general have been improving, as I indicated, I still might wish that those relations were all as cordial and mutually supporting as our meeting with you and the three presidents was.

I was especially appreciative of the concrete suggestions that you and your colleagues left behind. If anything further should occur to you upon reflection, please let me have it. [REDACTED] tells me that you and he have agreed to keep in touch. I hope you will do so as I've no doubt we can use your judicious counsel from time to time. It is good to know that you are in the vicinity.

Dear Peter:

I wish to express my deep appreciation that you were able to find the time in one of your busiest seasons to spend the day with me and my staff as you did on June fourteenth. Your interest, your understanding, and your probing inquiries were all gratifying and helpful. I was, of course, especially appreciative of your concrete recommendations on relations between the Agency and the academic community. Should any further suggestions occur to you as you reflect on our day together, I should be most grateful to have them too.

It may also be that questions will occur to you that you did not think to ask while you were here or you may find on reflection that the answers you received to some of the questions you did ask were not entirely clear or satisfying. Our discussions suggest that any such questions would be difficult to answer by correspondence; nevertheless, if you will let me have them, along with any further suggestions you have, I shall do my best.

Again, let me express my deep personal appreciation to you for your presence, your empathy, and your help.

Yours,

/s/ Stansfield Turner
